About me

   I'm an engineer by main education, who moved into IT field. Meticulous, responsible, follow through, never stop learning new things. Extremely motivated to constantly develop my skills and grow professionally. I can work both independently and in team, adapt quickly. I am applying for the position of Junior Front-End Web Developer with the possibility of further development and career growth. I will be glad to join a team of highly skilled developers, take part in projects and be useful to the company.
   Hobbies: sports, travelling, activities, music, literature, self-development.
