PROFILE

Front-End Developer with 4+ years of commercial experience building production web apps with React and Next.js. **Recently delivered the entire frontend of a multilingual telecom platform** (corporate website + customer dashboard with 200+ components) as the only front-end developer in a team of four. Background in engineering and project management helps me turn requirements into clean UI and work closely with designers, backend and PMs. Use AI tools (Claude Code, Claude, ChatGPT) daily to move faster without lowering code quality.

TECHNICAL SKILLS

Core: JavaScript (ES6+), HTML5, CSS3 / SCSS, TypeScript

Frameworks & state: React, Next.js (App Router, SSG), Redux Toolkit, RTK Query, React Router; Vue.js (Vuetify)

Forms, API & i18n: React Hook Form, Yup, REST API, Axios, react-i18next, OAuth (Google / Telegram), JWT cookie auth with token refresh

UI & styling: SCSS Modules, BEM, Flexbox / Grid, responsive & adaptive layout, Framer Motion, Tailwind CSS, MUI, Bootstrap, Figma → pixel-perfect implementation

Tooling & delivery: Git, GitHub / GitLab, GitHub Actions (CI/CD), Docker, ESLint, Prettier

Testing: Jest, Vue Testing Library

AI-assisted development: Claude Code, Claude, ChatGPT; prompt engineering for refactoring, debugging, boilerplate and documentation

Process: Scrum / Agile (ClickUp, Jira, Confluence), code review, mentoring

WORK EXPERIENCE

Front-End Developer | Business Telecom & VoIP Gateway Provider — 06.2025 – Present

Multilingual platform: corporate website + personal dashboard

- Built the frontend from scratch as the only front-end developer: **15–20 public pages and a dashboard with 200+ components, used by 150+ clients.**
- Designed the architecture on Next.js (App Router): static generation for the public site, client-side dashboard, locale routing with react-i18next, SEO metadata and hreflang. Public site scores 98 on Lighthouse Performance (LCP 1.0 s, CLS 0.01), 96 Accessibility, 100 Best Practices and 92 on SEO.
- Implemented auth end to end: registration with email verification, Google and Telegram login, social account linking, and automatic token refresh with request retry via an RTK Query base query.
- Developed the dashboard: usage analytics and call history, balance, top-ups with payment-status polling, fund transfers, equipment and project management with member permissions, profile and security settings.
- Organized the data layer with RTK Query (cache tags, invalidation, polling) and all forms with React Hook Form + Yup, keeping API logic out of components.
- Delivered a responsive, pixel-accurate UI from Figma on custom SCSS Modules (no UI kit), including a reusable component library: Button, Modal, Table, form inputs, tabs, etc.
- Set up ESLint / Prettier, Docker and GitHub Actions CI/CD, and automated release versioning.
- Use Claude Code and prompt engineering for refactoring, debugging and routine code, reviewing all generated output before merge.

Stack: React, Next.js, Redux Toolkit, RTK Query, React Hook Form, Yup, SCSS Modules, react-i18next, Framer Motion, Docker, GitHub Actions

Front-End Developer | QP 07.2023 – 02.2025

- Built dozens of responsive landing pages and websites that attracted new clients and drove traffic, consistently meeting business goals.
- Developed and extended UI components for a large in-house CRM that centralized analytics and client data for the traffic these sites generated.
- Investigated and fixed bugs, wrote unit tests with Jest, took part in code reviews.
- Mentored new team members and helped them get up to speed with the codebase.

Stack: Vue.js, Vuetify, JavaScript, HTML/CSS, Axios, Lodash, Jest, Git, Agile/Scrum (Jira, Confluence)

React Developer (part-time) | EXSY 09.2022 – 08.2023

- Developed functional and class React components, configured client-side routing and state management with Redux Toolkit, debugged and released apps.

Stack: React, React Router, Redux Toolkit, JavaScript

Junior Front-End Developer (part-time) | Hillel IT 03.2021 – 03.2022

- Built interactive, responsive landing pages and websites integrated with REST APIs.

Stack: HTML, CSS, JavaScript

EDUCATION & COURSES

EPAM - Front-End Fundamentals (JavaScript, TypeScript) and Front-End Specialization (React) 2024
Hillel IT School - Front-End Basic, Front-End Pro (certificate 1, certificate 2) 2021 – 2022
Odessa National Maritime University - Master's: Port Engineering; Master's: Project Management 2008 – 2014

LANGUAGES

English - Upper-Intermediate (B2) **Ukrainian** - native **Russian** - fluent
